

# Jon Herbert

Web Developer / Software Test Analyst

## EXPERIENCE

### **MIXO DJ Ltd, Remote — *Software Test Analyst***

April 2020 - PRESENT

My role includes testing all alpha and beta versions of the software, creating detailed feature ideas and bug reports, liaising with users on the support website about bugs and other issues, updating the website and support site; creating hundreds of guides and articles for the latter, researching difficult to solve problems and extensively outlining DJ software technical information for the team.

### **Toolkit Websites, Havant — *Development Liaison***

October 2019 - March 2020

Having created, redesigned and modernized hundreds of websites for Toolkit, I became Development Liaison, writing up and pushing for all backend improvements and bug fixes needed so the devs could upgrade and update accordingly, teaching new employees our CMS and design protocols, quality assuring every website using page insights and chrome lighthouse as guides and quoting for and developing bespoke front-end javascript where necessary.

### **Toolkit Websites, Havant — *Web Developer***

December 2017 - October 2019

Starting out as an apprentice helping in all areas of the company; learning their custom CMS and CRM systems, training clients how to use the software, creating new websites and updating old ones, I became a web developer full-time, fortifying what I had taught myself about web development.

## EDUCATION

### **University of Brighton, Worthing — *BA Music Production***

September 2012 - September 2013
